1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Cancel claims 19 and 20.

Specification page 1, line 10, before the word 'entitled', inserts – US Patent No. 6,983,076 --.

Specification page 1, line 11, before the word 'entitled', inserts – US Patent No. 6,859,204 --.

Specification page 1, line 13, before the word 'entitled', inserts – US Patent No. 6,987,882 --.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert Jackson (Reg. No. 46,796) on March 22, 2007.

2. The following is an examiner's statement of reasons for allowance: Prior art fails to teach a method and a system for obtaining background suppression information and further image enhancement information, comprising the steps of; counting the number of pixel luminance values or range of pixel values to produce a luminance histogram array of the input image, for each pixel luminance value, adding the pixel chrominance value or range of it to a second and third array to produce two dependent chrominance

histogram arrays of the input image, one for each of the chrominance channels, and processing the first, second, and third luminance and dependent chrominance histogram arrays to obtain the background suppression information and extract further enhancement parameters including the black point, white point and contrast parameters, and using the value of these parameters to automatically apply background removal and additional image enhancement to the input image.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-18 are allowed.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Feng et al is cited because the reference teaches background adjustment in color reproduction device.

Eschbach et al is cited because the reference teaches method for determining and loading an image-dependent look-up table for generating an enhanced image.

Fuss et al is cited because the reference teaches image processing using histogram prediction.
